

# Start Building Your Credit with as Little as \$100

A Secured credit card from First Latitude can do just that!

## To Get Started

- Pay a deposit (as little as \$100 or up to \$2000)
- Fill out a quick and easy online application - No credit history or minimum credit score required!
- Get a Platinum Mastercard! (bank account required)

## Low to No Credit? No Problem.

The First Latitude Platinum Mastercard Secured Credit Card is a new card program designed to help consumers establish credit records with the major consumer credit bureaus. Credit improvement information on each active card account is **reported monthly to all three major credit bureaus**—Experian, TransUnion, and Equifax. You post a security deposit to establish your credit line so that **no credit history or minimum score is required for approval**. Your security deposit serves as collateral for your obligations on the secured credit card account.

The First Latitude Platinum Mastercard Secured Credit Card is a **full-feature Platinum Mastercard** with a credit line based on a security deposit rather than on a credit score. The card is designed to advance the accumulation of new information in a credit file by reporting account activity to all three of the major national credit bureaus every month. And because it's a full-feature Platinum Mastercard, the **card provides the protection, convenience, and prestige** of the worldwide Mastercard system.

- Reports to all **3 major credit bureaus**
- **Credit reporting starts immediately** when your account is opened - just pay your bill on time to continue establishing your credit
- First Latitude Mastercard is **accepted worldwide and online!**
- Pay 6-months on-time and apply to get a second credit card in your wallet!
